“We’re delighted with the design of the website and the ease of use of the CMS.”

Lawrence Holmes,
Marketing Manager IMC (UK)

International Medical Corps UK is a global humanitarian organisation saving and rebuilding lives through health care, training and community development. IMC UK rehabilitates devastated health care systems and helps bring them back to self-reliance.

Acting in dozens of countries across the globe their previous website just wasn’t performing the functions they needed of fundraising and spreading the word on their work.

Byte Art were approached initially to review the performance of their website but were then contracted to create a new more interactive and engaging site for the organisation complete with customised content management system, online donations, streaming video integration and email marketing.

“Byte Art offered International Medical Corps a significant charity discount for the complete redevelopment of our website and CMS. ”

Lawrence Holmes,
Marketing Manager IMC (UK)
